- Number of days exercised in past week
- Barriers to pursuing exercise program
- Healthiness of home diet
- Level of concern regarding healthiness of diet

HEALTHCARE AND PHARMACEUTICAL ATTITUDES AND OPINIONS

- Non-prescription store brand drugs work as well as national advertised brands
- I always try to eat healthy foods and maintain balanced diet
- I participate in preventative healthcare
- Normally, I only use drug brands that are recommended by my physician
- I prefer alternative/holistic approaches to standard medical practice
- I research healthcare information so that I am better informed about different health conditions
- I do not seek help from doctors or nurses unless I am very sick or injured
- I dislike needles too much to consider a drug treatment that uses injections
- I believe there are mobile apps available that would improve my current health
- I would be willing to use a mobile app offered by my insurance health plan
- I would be willing to use a mobile app recommended to me by my doctor

Nielsen Scarborough MARS Healthcare Module

HEALTHCARE AND PHARMACEUTICAL OPINIONS AND ATTITUDES CONTD.

- I'd rather download an app than look for health-related information or tools on a website
- I am more likely to visit a health website that was recommended by my doctor or that I saw in my doctor's office
- I am more comfortable talking about health and wellness concerns online than I am face-to-face
- I am very cautious about which websites I access for health and wellness information
- More comfortable talking about health and wellness concerns online than face-to-face
- The Internet provides me with a wealth of resources when searching for health/wellness info
- The pharmaceutical healthcare information at a doctor's office is credible and useful
- I believe a wearable fitness tracker that connects to my mobile device or the internet would make it easier to track my diet and exercise
- I feel health and wellness advertising on the Internet is trustworthy
- I feel the Internet is a good way to confirm a diagnosis
- I trust the medical information other people share on social media
- I refer my friends to certain websites I find helpful
- Online videos help me understand complicated subjects
- I often discuss new prescription medicines with my doctor
- Non-prescription medicines are safer than prescription medicines
- Friends come to me for advice about healthcare and medications
- I research treatment options on my own and then ask my doctor about them
- I trust the opinions of my family and friends about health related issues
- I believe that vitamins and nutritional supplements make a difference in long-term health
- I always do what my doctor tells me to do
- I am willing to pay extra for prescription drugs not covered by health insurance
- Healthcare advertising on the Internet is credible
- I trust pharmaceutical companies that advertise the medications I take
- The opportunity to download and share my health and fitness data with others motivates me
- I always read the small print in magazine/newspaper pharmaceutical ads
- Pharmaceutical advertisements make me more knowledgeable about medicines
- It's worth paying more for branded prescription medications rather than getting prescription products
- Web-connected devices are too complicated
- I am concerned about my personal health and fitness data being stored securely online
- I typically conduct research online prior to a doctor's appointment
- Researching online gives me confidence to speak knowledgeably about a medical condition
- The Internet is the first source I turn to when researching health and wellness
- It is very important that my health insurance covers all my prescription medication
- I first try to remedy my illness with non-prescription medication before seeing a doctor
- Prescription drugs are more effective than non-prescription remedies
- I am willing to ask my doctor for a prescription medication or drug sample that I have seen or heard advertised
- I am hesitant to take prescription drugs with side effects that concern me
- I take non-prescription medicine as soon as I get sick
- I am comfortable registering on a website which consistently offers useful information about my particular health condition
- The pharmaceutical healthcare information at my pharmacy is credible and useful
- I am better informed about my health than most people
- I sometimes stop taking a prescribed medication without consulting a doctor
- I will try another drug brand if I get a coupon for it
- My condition makes it difficult to do/complete day-to-day tasks
