NPOWER & MARKETBREAKS: ROLLING TSV

Nielsen has enhanced NPOWER and MarketBreaks to report time-shifted Broadcast and Cable program ratings on a daily, rather than weekly, basis beginning with data for Monday, August 29, 2016. Data will be Total Day for 3a-3a.

Every day, program ratings are re-released to include an additional day of time-shifted viewing. With this enhancement, Live+1 Total Day ratings are released on day three; Live+2 Total Day ratings are released on day four; and so on, until Live+7 Total Day ratings are released on day nine.

This enhancement enables clients to receive program ratings that reflect the build of audiences by day on an extremely accelerated basis.

Time period, commercial and syndication data remain on their existing schedules.

I. Rolling Time Shifted Viewing Data Delivery Comparison

      • TV/Online Data Fusion
      • Non-Linear Program
      • Non-Linear Computer Census
      • Non-Linear Mobile Census
      • Computer Census Total Day Live+3 Prelim
      • Computer Census Total Day Live+7 Final
      • Mobile Census Total Day Live+3 Prelim
      • Mobile Census Total Day Live+7 Final

      *Note the order has changed to keep Time Period, Broadcast, Cable, and Syndication selections together.
IV. FAQ – Rolling Time Shifted Viewing (TSV)

1. Will the rolling TSV ratings include programs in all dayparts or just prime?
   For L+1 and beyond, Total Day will be reported. Live and Live+SD, will be Prime Only deliverables for Broadcast Monday – Friday.

2. Why are we only delivering in NPOWER/MarketBreaks and NOT AMRLD at launch? Why not delay until both are ready?
   The goal is to get data in clients' hands as quickly as possible and to be available for the start of the 2016-2017 TV Season.

3. What types of data differences should be expected between the Preliminary L+7 and Final L+7 data?
   Additional Sunday L+7 TSV viewing for the 3-6am Sunday window will be included, along with program label changes, such as repeat indicators and episode titles. These program label changes are occurring today post L+7.

4. Why is syndication not included in this change?
   Due to the station airing model for syndicated programs, producing the daily lineups necessary to enable this change is not applicable.

5. Will the products be enhanced for performance with these changes?
   Additional hardware to process the additional data upstream was added.

6. Will there be any NPOWER reporting changes when Rolling TSV is launched?
   Yes, a new Data Availability worksheet will be added to the excel output, which illustrates the latest data available at the time the report was generated. If macros are use please take note of this additional worksheet. See screenshot below for an example.
